

# Farmzie HUB For Distributors & Food Hubs

Streamline your new or existing Food Hub.

Farmzie HUBs provide logistics and distribution for Farmzie orders by picking up from designated ad-hoc collection points (Drop-off Locations) and delivering them to Customer Pickup Locations or directly to the customers home or workplace. Farmzie HUBs have the opportunity to make a profit for their services by charging a markup (typically 15-25%).

## **Who can become a Farmzie HUB?**

- Existing Distributors
- Non-Profits
- Farmers Markets
- Restaurants
- Grocery Stores
- Churches
- Neighborhoods
- Any organization looking to spread local fresh food in their community.

## **Can my organization sell its own products in addition to my vendors?**

Yes! Farmzie understands that in order to be competitive, HUBs may need to sell products not available locally. Farmzie allows you to add these items to your HUB's market so long as you clearly describe the product and its origin.

## **How do I onboard my Farms?**

Please see the "On-boarding Farms & Vendors" section.
